What is Ethnography

- It is built upon the social science specialism known as '**anthropology**'.
- **Ethnographic designs** are qualitative research procedures for describing, analysing, and interpreting a **culture-sharing** group's **shared patterns** of behavior, beliefs, and language that develop over time.
- A **culture** is "everything having to do with human behavior and belief" (LeCompte, Preissle, & Tesch, 1993, p. 5).
- It can include language, rituals, economic and political structures, life stages, interactions, and communication styles.

(Creswell, 2012).

Emic versus etic perspectives Multiple Perspectives Can Lead to Greater Knowledge and Understanding Levels of Cultural Awareness Level Information Mode Interpretation 1 Awareness of superficial or very visible cultural traits; stereotypes Tourism, textbooks Unbelievable: weird, exotic 2 Awareness of significant and subtle cultural traits that contrast markedly with ones own. Culture-conflict situations Unbelievable: frustrating, irritating 3 Awareness of the meanings of the cultural traits that contrast sharply with ones own. Intellectual analysis Believable: I understand cognitively 4 Awareness of how another culture feels from the standpoint of the insider. Cultural immersion; living the culture Believable: I understand affectively Key Point It is doubtful that one can impact members of a cultural group without at least a Level 3 cultural awareness. Ethnographic Research is an important part of attaining that level. Key Thought: If we do not learn to understand (at least cognitively) another culture, we will not appreciate them or respect them. not know how to communicate effectively with them. If this is the case, how will we share Gods word with them? Key Point. Christians tend to emphasize the differences between Christianity and other Worldviews.
